

con-pearl[®]
trunk floor

... glass fibre and carbon fibre reinforced !

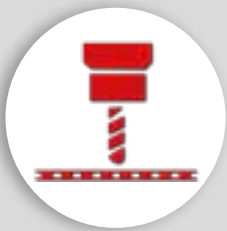

many processing possibilities

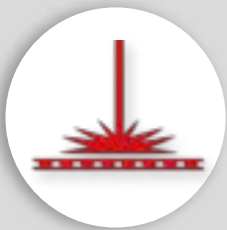

cutting

punching

milling

laser

In terms of stability, we set new standards with our **glass fibre** and **carbon fibre** reinforced trunk floor carrier boards.

We are your partner for the development of customized trunk floors. With our products we already supply many OEM.

- » maximum load capacity at minimum weight
- » fast production of prototypes
- » lamination of fleece without adhesives
- » no tooling costs for board production
- » recyclable

Our Product Range

con-pearl[®] standard

Basic material in proven con-pearl[®] quality!

- ultra lightweight
- cost effective processing
- moisture resistant
- recyclable
- many surface variations

available in 3 different weights*:

CP5 1000; CP5 2000; CP10 2500

con-pearl[®] glass fibre

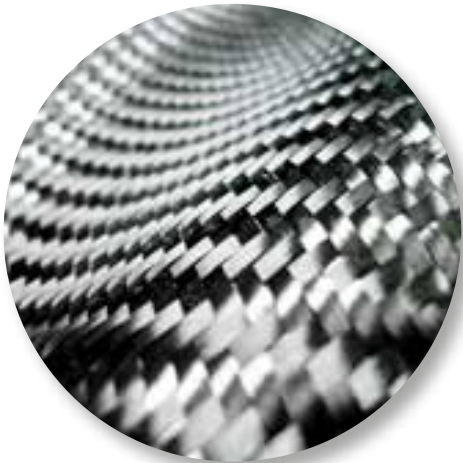

Glass fibre reinforced - for higher strength!

- higher load capacity
- improved load distribution
- improved bending stiffnesses

available in 2 different weights*:

CP5 2000; CP10 2500

con-pearl[®] carbon fibre

Carbon fibre reinforced - for the highest demands in premium quality!

- low deflection
- maximum load capacity
- higher temperature resistance

available in 2 different weights*:

CP5 2000; CP10 2500

* Other grammages available on request.
